JSTOR is a digital library of academic journals, books, and primary source objects. JSTOR helps people discover, use, and build upon a wide range of content through a powerful research and teaching platform, and preserves this content for future generations. JSTOR is part of ITHAKA, a not-for-profit organization that also includes Ithaka S+R and Portico. For more information about JSTOR, please contact [support@jstor.org](mailto:support@jstor.org).

XIV. *Part of a Letter from M. Geoffroy, F. R. S. and Member of the Royal Academy of Sciences at Paris, to Sir Hans Sloane, Bart. late President of the ROYAL SOCIETY, concerning a Child of a monstrous Size.*

Read Dec. 22.  
1743.

**N**ormandy has furnished us some Years ago a Child, monstrous by its Size, and a Strength which its Age could not naturally afford. It was born at *Roüan*, and is a Prodigy of Virility, of Three Years and Two Months of Age, perhaps One Month older, and is now in the Hospital at *Roüan*. It has a very large Neck, the Breast very broad, and the Belly bigger than in its natural State. The upper Part of the Thighs is a little thickish, the rest is conformable to its Age. He has Hair only about the Privy Parts; the *Penis* is Three Inches long when there is no Erection, but of Six when there is any. They have found him to have Emissions. The Fact is very true, and M. *Le Cat*, F. R. S. a Surgeon at *Roüan*, has fully traced it out.—
